More about our services

Psychosocial Recovery Coaching

- Recovery coaching creates a clear plan of action while using the participants current strengths to reach their desired goals. Besides helping the participant access and maintain recovery, coaches access systems and resources needed to support the recovery such as benefits and health care. Recovery coaching also helps individuals return to employment, find stable housing and transition. The participant self directs their own recovery while the coach provides expertise and encouragement in supporting the necessary change and attaining the goals important to the individual.

SLES – School Leaver Employment Support

- School Leaver Employment Supports (SLES) is an early intervention approach for Year 12 school leavers. It's designed to support their transition from school to employment. Hourly fees negotiated.

FAKAJ – Finding and Keeping a Job

- Capacity building supports aimed towards the goal of finding employment and keeping it. Customers who are current DES customers and have this code in their NDIS Plan are eligible for extra support that is unable to be provided by DES to help them achieve an employment outcome or maintain employment.

Core Support funding within the participants NDIS Plan can also be utilised for building capacity as identified in the NDIS Plan (eg. tutoring).

All consultants are tertiary trained with lived experience.

A service based locally on the South Coast
Should you have any queries about eligibility for support please
dont hesitate to contact Fleurieu Support Services on **Mobile:**
