

## About ABALink

ABALink was founded in 2007 by our Managing Director, Christina Campbell. Her own personal experience puts her in a unique position to help you. Christina's son, Logan, was diagnosed with autism at two & a half, and as she navigated the labyrinth of autism services she formed the firm belief that early behavioural intervention therapy offers the greatest opportunity for life-changing results. In 2020, Logan finished high school & began working as a volunteer at Taronga Zoo.

ABALink are committed to making a difference by working together to create meaningful change in the lives of children & their families.

## Evidence Based Early Intervention

Helping children and adolescents reach  
their full potential through Early Intensive  
Behavioural Intervention Therapy

## Initial Consultation

The first step to getting started with any of our services is a one hour Initial Consultation with ABALink's Managing Director, Christina Campbell. Conducted by video call or in our Ryde office, this is an opportunity to discuss your child's needs & see if early behavioural intervention therapy is right for your family.

## Assessment

Following your Initial Consultation, the next step is an Assessment with one of ABALink's Supervisors. We spend 2.5 hours getting to know you & your child at our clinic in Ryde, then construct an individualised ABALink program finely tailored to target your child's needs.

## Early Intervention

ABALink utilises a proven 3-tier model to deliver effective behaviour therapy. Each week you will see your Junior Therapist for 6 hours (3 hours twice a week) & your Senior Therapist for 2.5 hours. Every 4 weeks, your Senior session is replaced with a Clinic, where your Junior, Senior & Supervisor meet to discuss your child's progress.

## Little Links

ABALink's popular school readiness program is designed for children aged 3-6 & currently runs 9am-3pm on Tuesdays & Thursdays at our centre in Ryde. Running for 10 weeks per term, the class is limited to 6 children, each paired with a behaviour therapist for the whole day.

## SuperSitters

Unlike a normal babysitter, ABALink's SuperSitters have all completed Behavioural Intervention therapy training & understand your child's needs & abilities. While they don't conduct any therapy, they will reinforce positive skills & discourage negative behaviours while intentionally engaging with your child.

## Links to Life

Our capacity building program for adolescents & young adults aged 13-25 uses a 3-tier model (mirroring Early Intervention) that focuses on increased independence and preparation for life as an independent adult.
