

LifeVac...life taken seriously.

LifeVac has saved more than 55 lives ranging from 11 months old to 95 years.

LifeVac has never failed to relieve an airway obstruction after first aid measures have failed.

LifeVac has never caused any injury or harm to any person.

LifeVac is easy to use with its place-push-pull action by parents, teachers, first-aiders, paramedics, childcare workers, disability carers, aged-care workers, staff and even on yourself.

LifeVac has been studied, tested and proven to save lives.

LifeVac has approvals around the world, is a registered NDIS safety product and available now in a range of kit options to suit any home, business or organisation.

Protecting our family and yours; simply, effectively and safely...
