Behavioural Services for people with Developmental Disabilities

(including Autism and Intellectual
Disability)

About Sunrise Behavioural Health

Sunrise Behavioural Health was established with an aim to provide high quality behavioural health solutions to people with developmental disabilities such as autism, intellectual disability etc. We are an experienced team of professionals (Board Certified Behaviour Analyst (BCBA), Psychologists, Social Worker, Speech and Language Pathologists, Occupational Therapists) with a passion to assist children and adults with autism and other developmental disorders by using the cutting edge research in our practice to achieve the best treatment outcome for each client.

Our treatment approach is based on the principles of Applied Behaviour Analysis (ABA). ABA is a science of 'behaviour change' with a focus on application of behavioural principles to improve the socially significant issues such as challenging behaviours and learning (Baer, Wolf & Risely, 1968). We, thus utilize principles of learning to resolve behavioural and/or mental health concerns as well as improve the adaptive functioning of individuals who approach us for treatment.

We offer a wide range of behavioural services to children and adults with autism,

Our professional services

- **Behavioural Treatment for individuals with Autism Spectrum Disorders**

With the 'best treatment outcome for each client' in mind we rely on the scientifically validated procedures derived from applied research. We offer 'comprehensive' as well as 'focused' intervention options to our clients / families. We do offer other ancillary ABA training and development services to parents, carers, and support staff.

- **ABA and Challenging Behaviours**

ABA based interventions are recognized as the best evidence-based treatment strategies for reducing and eliminating challenging behaviours of individuals with disabilities. Our service provision focus goes beyond the reduction of problematic behaviours to improve quality of life for individuals with autism, and engaging them in meaningful skill acquisition programmes.

- **Specialized Therapeutic Care Services**

Our Specialized Therapeutic Services aim to provide highly individualized and comprehensive care addressing skill deficits and other concerns. The therapeutic care plans are designed with inputs from multi-disciplinary team members such as speech therapist, occupational therapist, psychologist, educator and behaviour specialist /BCBA (Board Certified Behaviour Analyst) to provide holistic care in a safe and nurturing environment.

- **Specialized Skill Acquisition Programme**

We provide specialized skill acquisition packages in the areas of functional communication, emotional regulation, feeding, toileting, social skills, pre-vocational skills, self-hygiene, and transportation / community access with an aim to foster a greater degree of independence and improve quality of life of people impacted by a developmental disability.

- **Assistance with Academic Skills**

To foster learning and development of children with development disabilities, we also provide specialized assistance with the development of academic skills in addition to other services mentioned above.
